Netscanner — — [DEMO](#)

Effortlessly discover devices on your network using Python Scapy.

Source :- <https://github.com/anishalx/netscanner>

GhostARP — — [DEMO](#)

Efficient ARP spoofing tool for penetration testers & professionals.

Source :- <https://github.com/anishalx/ghostarp>

Experience | Cybersecurity Intern

Self-Driven Projects August 2024 – Present

- Developed **GhostARP**, a lightweight ARP spoofing tool designed for penetration testers and ethical hackers, improving network vulnerability assessments.
- Engaged in ethical hacking and penetration testing using **Burp Suite**, uncovering vulnerabilities such as IDOR, hidden credentials, and flags.
