TECHNICAL PROJECTS

MacIP —   Source/Live

command-line tool for managing and changing MAC and IP addresses.

GhostARP —   Source/Live

A tool for performing man-in-the-middle (MITM) attacks to intercept and manipulate network traffic.

Sniffex —   Source/Live

Lightweight packet sniffer captures HTTP traffic, extracts URLs, credentials.

NetScanner —   Source/Live

Identifies devices on a network by retrieving IP and MAC addresses via ARP requests.

SpoofShifter —   Source/Live

DNS spoofing tool intercepts requests, redirects users to malicious IPs.

EDUCATION

Aarupadai Veedu Institute of technology | *CHENNAI-*

Cybersecurity - 3rd year BE   2022-2026

CGPA-: 9.4 | PRESENT

EXPERIENCE

- Conducted vulnerability assessments using **Burp Suite**, identifying and exploiting OWASP Top 10 issues like **IDOR, SQL Injection, and XSS**.

- Built custom scripts in **Python, Bash, and JavaScript** to automate tasks and improve testing processes.

- Participated in **bug bounties**, solved **Burp Suite labs**, captured flags in **picoCTF**, and completed multiple rooms on **TryHackMe** to hone cybersecurity skills.

CERTIFICATIONS

Google Cybersecurity Specialization
Google Cloud Cybersecurity
Learn Bug Hunting and Testing
Learn Ethical Hacking
ISC2-Certified in Cybersecurity
CISCO-Introduction to Cyber

TECHNICAL SKILLS

- Python/Bash/C++

- Linux/Bug Hunting

- Burp Suite, Wireshark, Nmap

- SQL/SIEM/JavaScript

- Cloud Shell/Cloud logging

SOFT SKILLS

- Problem Solving

- Critical Thinking

- Team Collaboration

- Adaptability
